

# eRESULTS ADVANCED MPLS NETWORK SOLUTIONS

## CARRIER AGNOSTIC SEAMLESS NETWORKING BETWEEN MULTIPLE LOCATIONS

Make the move to eResults Network Solutions to leverage the benefits of MPLS over multiple carrier networks

### About eResults

**eResults is committed to helping small and medium sized businesses better understand the benefits of cloud computing to help them achieve their business goals.**

**eResults is 100% Canadian, and all of our cloud assets are located in Canadian Tier 3 certified data centers. This provides our customers with peace of mind knowing where their data or their client's data resides. We offer a full suite of cloud services from servers, backup, file sync and archive, through to virtual desktops and hosted Microsoft solutions.**

**Contact us today to learn how eResults can provide you with the partnership and peace of mind that you're looking for.**

All eResults networks use Multiple Label Switching, (MPLS) to ensure high performance for real time solutions to ensure the highest network performance for your critical applications and internet requirements. eResults can connect all of your locations, employees and applications onto a single wide area network. Our MPLS solutions offer Quality of Service (QoS) for your mission critical applications. You can also take advantage of many redundancy options across multiple service providers to ensure your business is always operational.

The eResults core network infrastructure connects and aggregates carrier MPLS networks into a multi-carrier, best-of-breed MPLS network with coverage across Canada and Internationally. The convergence of voice, video and diverse grades of data onto a single network will inevitably improve performance and will likely provide cost savings. With eResults MPLS connections it has never been easier to build an intelligent network, with architected flexibility. eResults simplify your network requirements, by managing, monitoring, and customizing multiple carrier services to suit your individual requirements.

## Access Options

- Fibre-optic 10 Mbps
- Fibre-optic 100 Mbps
- Fibre-optic GigE
- Fibre-optic 10GigE
- 10 Gbps & 100 Gbps
- ADSL
- Wireless
- Ethernet over Cable

## The eResults Advantage

### RELIABILITY

99.9% network access uptime with multi-carrier redundancy and automatic fail-over. You can feel secure with premium service level agreements which satisfy industry key leading performance metrics

### PERFORMANCE

Built-in QoS priority for your voice traffic and other critical applications without additional fees. You will experience much lower latencies than traditional public networks

### FLEXIBILITY

Customized configurations to optimize your network routing, redundancy, and bandwidth for MPLS applications, Layer-2 replication, and Internet access. No matter where your business is located or what types of services you are running our MPLS solution can unify your network design and provide you with a wide range of choices that meet your bandwidth and budget needs

### INCREASED PRODUCTIVITY

With a securely connected, single network, you will benefit from faster communication and information sharing. You will have the support in place to allow for advanced applications such as videoconferencing and collaboration tools

### SUPERIOR

Support and Service: 24/7 pro-active monitoring and support with fast response times and detailed network reports. eResults customize, manage, and monitor the Carriers for you, so that you can focus on your core services.
